What is StudyBuddy?

StudyBuddy is the ultimate student productivity software designed to empower students. With its intuitive interface and powerful features, StudyBuddy is the perfect digital companion, enabling students to streamline their study routines, enhance their learning experience, and achieve their full potential. Seamlessly manage your tasks, assignments, and notes all in one place. With StudyBuddy, you'll experience a new level of organization and efficiency.

Following are some benefits of using studybuddy:

Improved Organization: StudyBuddy eliminates the chaos of scattered notes, deadlines, and study materials. It offers a centralized platform to manage tasks, schedules, and resources, enabling students to stay organized and focused on their academic responsibilities.

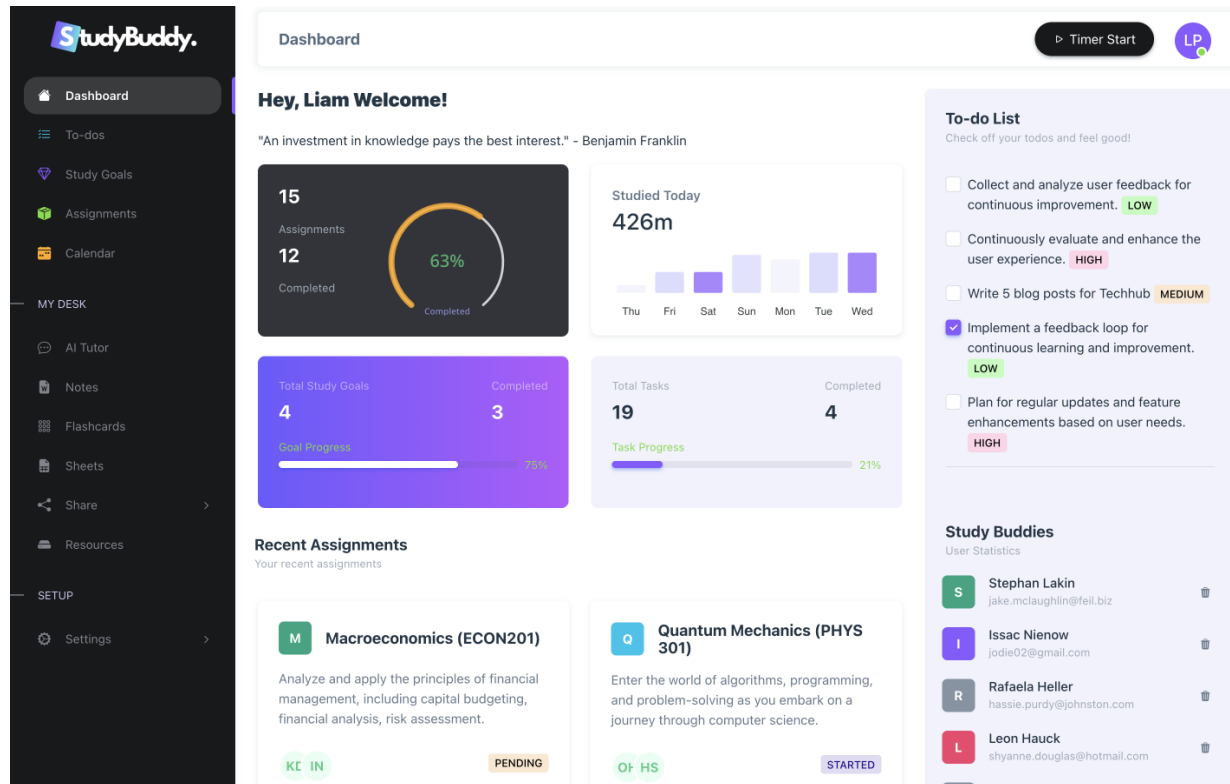

Enhanced Time Management: With its personalized study planner and task prioritization features, StudyBuddy helps students allocate their time effectively. By optimizing study schedules and managing deadlines, students can make the most of their available time, improving efficiency and reducing stress.

Active Learning: StudyBuddy promotes active learning through its interactive study tools. Incorporating features like digital flashcards and note-taking encourages students to engage with the material actively, enhancing understanding and retention.

Progress Monitoring and Motivation: StudyBuddy allows students to track their progress and accomplishments, providing a sense of achievement and motivation. By visualizing their growth and identifying areas for improvement, students can set goals, stay motivated, and strive for continuous progress.

Collaboration and Teamwork: StudyBuddy facilitates seamless student collaboration, particularly for group projects. Offering a dedicated space for communication, task delegation, and progress tracking ensures effective teamwork, enhanced productivity, and successful project outcomes.

Stress Reduction: By providing a structured and organized study environment, StudyBuddy reduces stress and overwhelm. It allows students to approach their tasks systematically, enabling them to focus on learning and achieving their academic goals without unnecessary anxiety.

In summary, StudyBuddy is an invaluable tool for students seeking to optimize their productivity, manage their time effectively, and excel academically. With its user-friendly interface and comprehensive features, StudyBuddy empowers students to stay organized, engaged, and motivated throughout their educational journey.

You will install it on your hosting, and you can access them from anywhere, any device, via a web browser.

Installing StudyBuddy

What are the system requirements?

This application is built with the latest version of Laravel. So it follows the same requirement of the Laravel framework.

Most modern web hosting providers already have these enabled.

- PHP >= 8.0
- BCMath PHP Extension
- CType PHP Extension
- cURL PHP Extension
- DOM PHP Extension
- Fileinfo PHP Extension
- JSON PHP Extension
- Mbstring PHP Extension
- OpenSSL PHP Extension
- PCRE PHP Extension
- PDO PHP Extension
- Tokenizer PHP Extension
- XML PHP Extension

It also requires URL rewrite enabled. The system automatically creates the required ".htaccess" file when you first load the application during installation.

Download the Application

Download the latest version from your Envato Profile to install and get started.

How to download the latest version?

To download StudyBuddy:

1. Log in to your Codecanyon account.
2. Hover over your username from the top right corner and click
3. 'Downloads' from the drop-down menu.
4. The downloads section lists all the items purchased using your account.
5. Click the 'Download' button next to the item and select 'Main File(s),' which contains all files, or 'Licence Certificate and Purchase Code' for the item license information only.

Upload the file to your Server/Web Hosting

Upload and unzip the application zip file on your server, and unzip it directly; this will ensure you have uploaded all files.

However, you may also unzip the zip file on your computer and upload them manually via FTP or any other program.

On the downloaded package, you will find two files; one is this documentation itself, and another one is StudyBuddy.**zip** which of the file you will upload on your server. Upload the zip file and unzip it directly into your server.

The installation wizard

After uploading, visit the URL where you uploaded the application. The browser will show you the installation wizard.

However, if your server fails with the general system requirements, for example, a PHP version lower than 8.0, it will show the error message instead of the installation wizard.

The following screenshot shows how it looks-

StudyBuddy.

Hey, Welcome!
Install the application to get started.

Database Info

DATABASE HOST

DATABASE NAME

DATABASE USERNAME

DATABASE PASSWORD

[Continue](#)

Database Info

StudyBuddy requires MySQL 5.7+ or MariaDB 10.3+

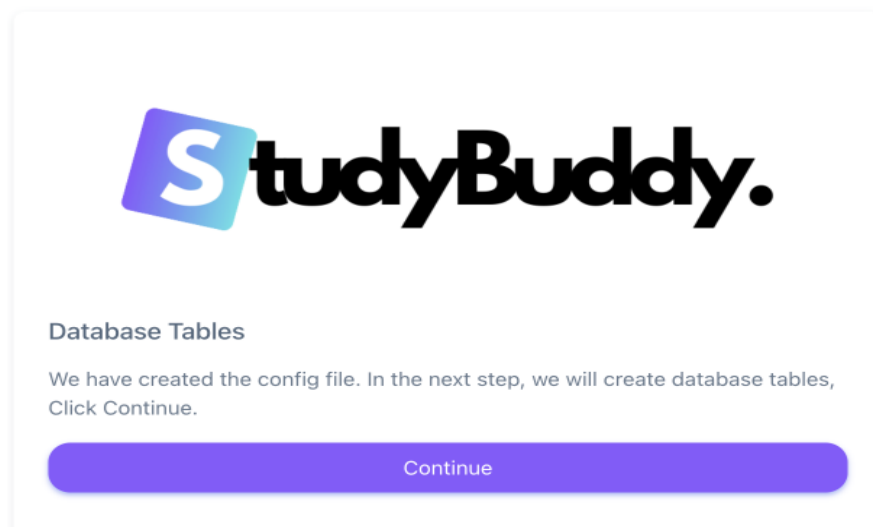

You will need following database information-

- Database host
- Database name
- Database username
- Database password

The system will test the database credential before creating the config file. It will show as an error message if it encounters an error when connecting to the database.

Database Tables

After validating the database details, it will create the config file and show the next step.

Clicking Continue will create the Database Tables. Depending on your system, it might take a few moments.

The First User & The Primary Data

In the previous step, the system creates database tables. First, however, the system needs to register you as the first user so you can log in. So, in this step, it will do this.

User

We have created database tables. Now we will create the first user and generate initial data.

FIRST NAME

LAST NAME

EMAIL

PASSWORD

Remember, it is the password you will use to log in, not the database password.

CONFIRM PASSWORD

Continue

Fill up the form with your details and use a strong password. You will log in with this information. You have installed the application

The installer completed the installation.

Click “Go to Login” and then you should be able to log in with the username(your email) and the password you used in the previous step.

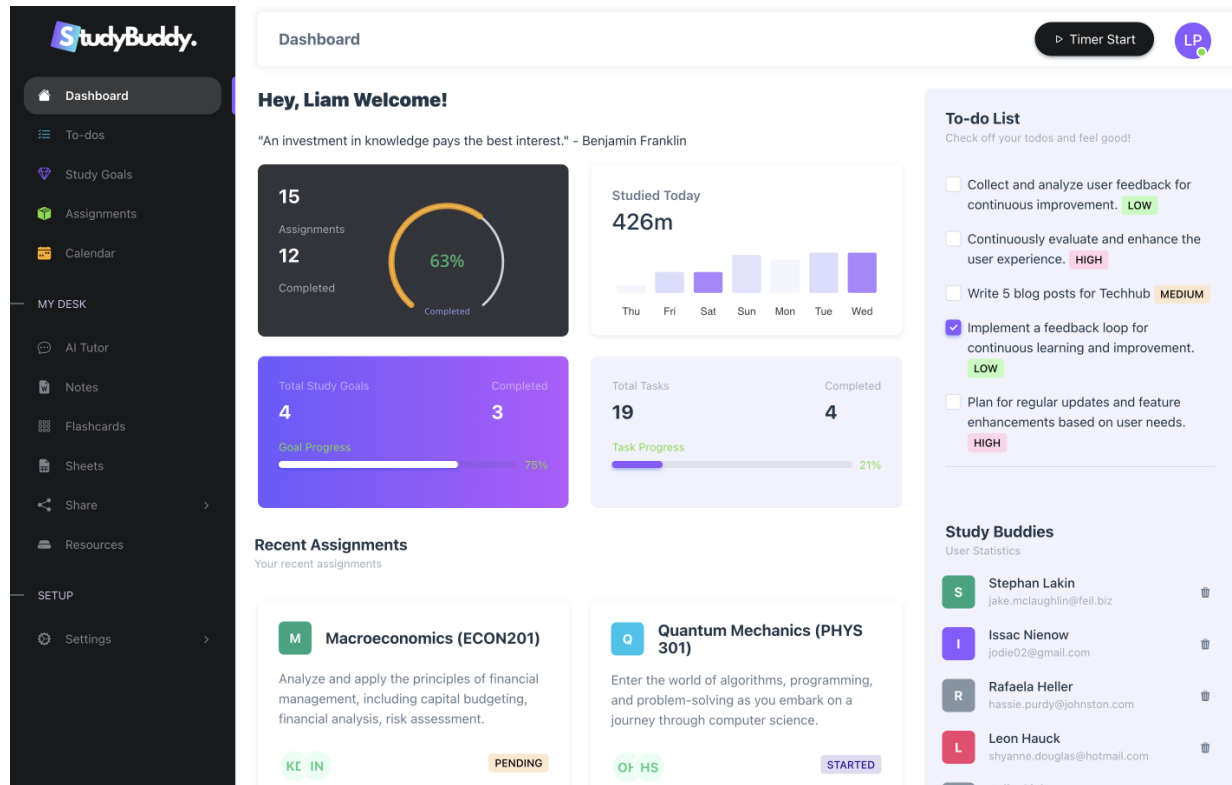

Congratulations!

Installation is complete.

Go to Login

The Dashboard

StudyBuddy dashboard is the user interface that provides an at-a-glance view of your notes, stats, and other essential data. For example, the dashboard will show you the recently opened notes, recent to-dos, recent study goals, progress overview, recent study partners, and an overview of other activities.

You can also navigate to the apps and quickly create documents or events from the dashboard.

Task Management

To-dos

StudyBuddy simplifies task management by allowing students to create, organize, and prioritize their assignments and study tasks in one centralized location. Students can set deadlines manage priorities.

Study Goals

The "study goal" feature is a functionality or characteristic of a study or productivity-related application or platform. It allows users to set specific goals or targets for their study sessions or academic pursuits. The purpose of this feature is to help individuals stay focused, motivated, and organized while working towards their learning objectives.

Create Study Goal

To create study goals go to study goals on the left sidebar then click on create new study goal as shown below.

The image displays two screenshots of the StudyBuddy application interface, illustrating the process of creating a study goal.

Top Screenshot: Study Goals Overview

- The left sidebar shows the navigation menu with "Study Goals" highlighted.
- The main content area is titled "Study Goals / Manage your Study Goals".
- A "Timer Start" button and a user profile icon (LP) are visible in the top right.
- A "Create New Studygoal" button is highlighted with a blue arrow.
- The "Study Goals" list contains two items:
 - Understand computer vision and image processing**: Description: Explore the domain of computer vision and image processing, covering topics like object detection, image segmentation, and image recognition. Utilize libraries such as OpenCV and TensorFlow for practical applications. Created: 01 JAN 1970 Finish by: 31 DEC 2023.
 - Apply AI in real-world projects**: Description: Apply your theoretical knowledge by working on practical AI projects. Engage in hands-on experiences, participate in Kaggle competitions, and collaborate on AI projects to gain valuable industry experience and showcase your skills. Created: 01 JAN 1970 Finish by: 23 SEP 2023.

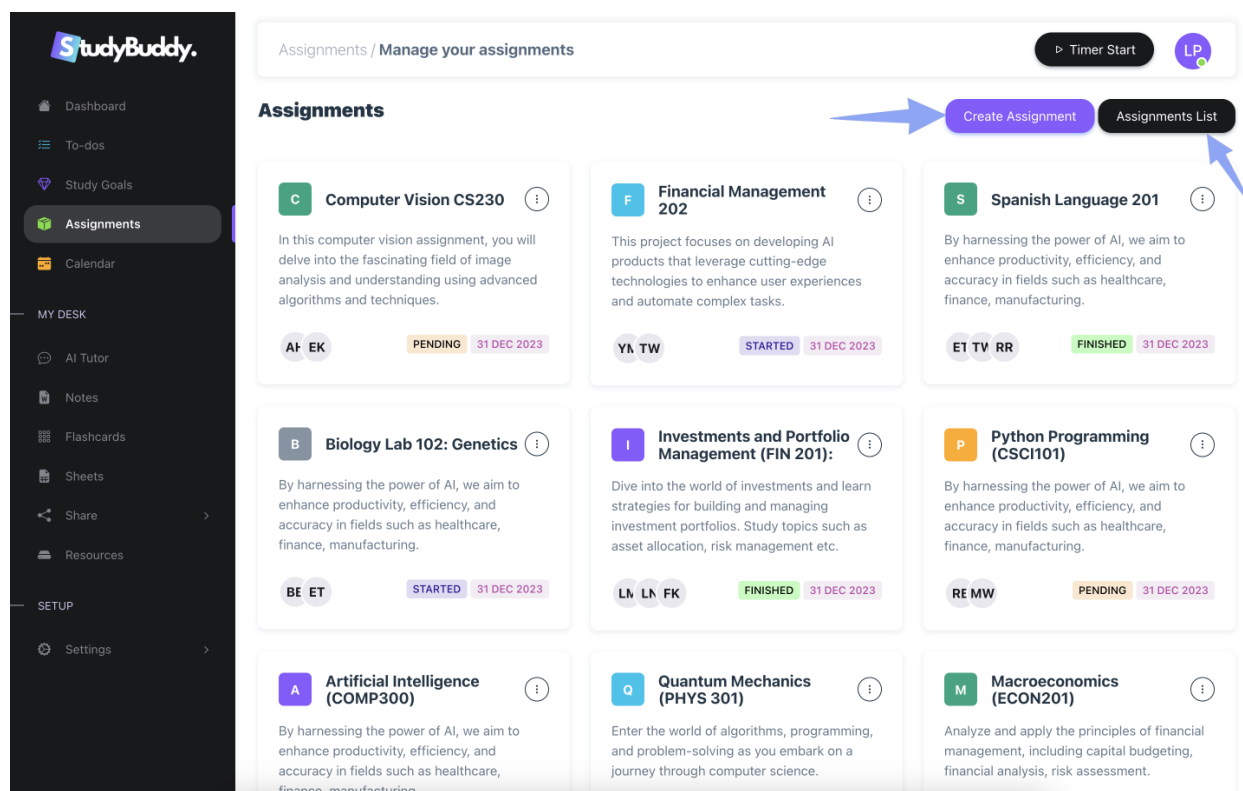

Bottom Screenshot: New Study Goal Form

- The left sidebar shows the navigation menu with "Study Goals" highlighted (indicated by a blue arrow).
- The main content area is titled "Study Goals / Manage your Study Goals".
- A "Timer Start" button and a user profile icon (LP) are visible in the top right.
- The "New Study Goal" form is displayed with the following fields:
 - "What topic do you want to learn*": A text input field.
 - "Studying for*": A text input field (indicated by a blue arrow).
 - "Start Date": A date picker showing 2023-07-12.
 - "End Date": A date picker showing 2023-07-12.
 - "PROJECT DESCRIPTION": A section with a text input field and a rich text editor (indicated by a blue arrow).
- A "Save" button is located at the bottom of the form (indicated by a blue arrow).

Assignment Management/ Study Planner

The assignment management feature of StudyBuddy will amuse you as you can create assignments/study plans, assign team/group members, select related clients, and keep your projects tidy. Under each project, you can add tasks and see the progress of the project when you view the project. This feature is essential for everybody who gets help from AI to create their work, such as video scriptwriters; name any professional who seeks AI to write, ideate and plan.

Creating Assignment

To create an assignment click on the create assignment button and it will take you to the page where you can create the assignment or study plan. Some fields are mandatory. So, you must fill the mandatory fields such as title and team members to successfully create an assignment. After creating the project you can view it.

Calendar

StudyBuddy includes an in-built calendar application. You can use the calendar to view events by day, week, or month.

The screenshot shows the 'Calendar' page in StudyBuddy. The left sidebar is the same as the previous screenshot, with 'Calendar' selected. The main content area shows the 'Calendar / Schedules and events' header. Below it, the 'Calendar' section displays a monthly view for 'July 2023'. The calendar grid shows dates from 1 to 31. Events are listed for specific dates: '6:21p study math' on Wednesday, July 12th, and '2:21p Study Computer' and '2:22p Prepare Notes' on Friday, July 14th. Navigation buttons for 'month', 'week', 'day', and 'list' views are available, along with arrows for previous and next months, and a 'today' button.

< > today

Sun	Mon	Tue	Wed	Thu	Fri	Sat
25	26	27	28	29	30	1
2	3	4	5	6	7	8
9	10	11	12 6:21p study math	13	14 2:21p Study Computer 2:22p Prepare Notes	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30	31	1	2	3	4	5

Users can use it in various contexts, such as personal use, group or team coordination, and public events. You will also find the calendar widget on your dashboard, which is the same source of the events. In the next section, you will find a guide to managing your calendar events.

Adding an Event

You can click anywhere in the Calendar or click on the "Add Event" button in the top right corner. It will open up a modal form to enter your event details.

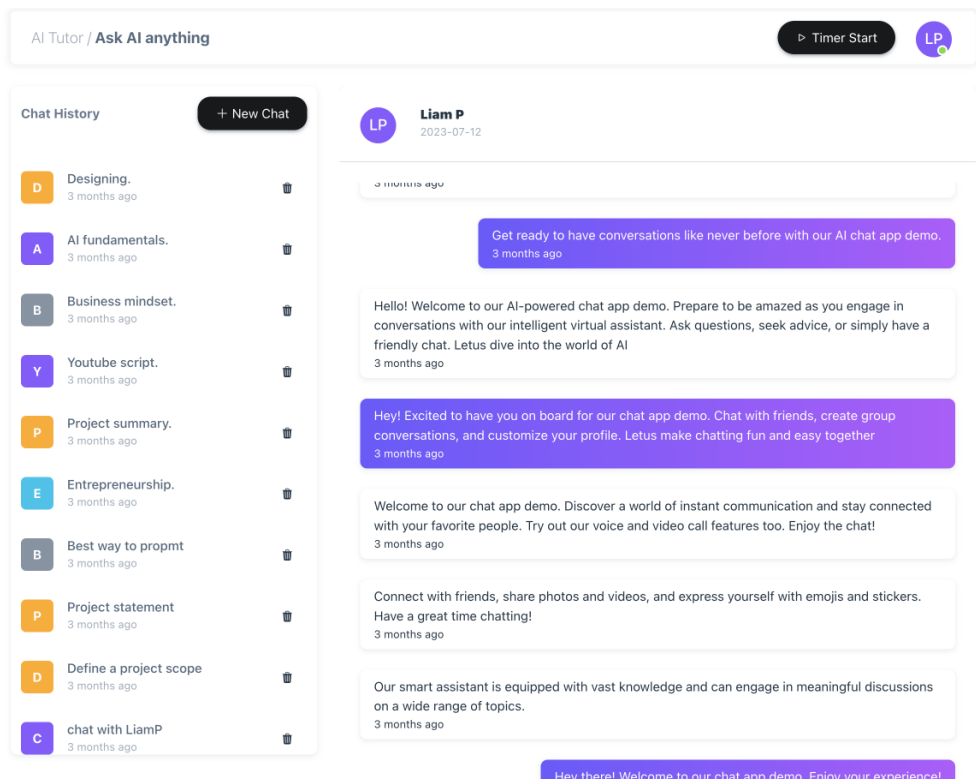

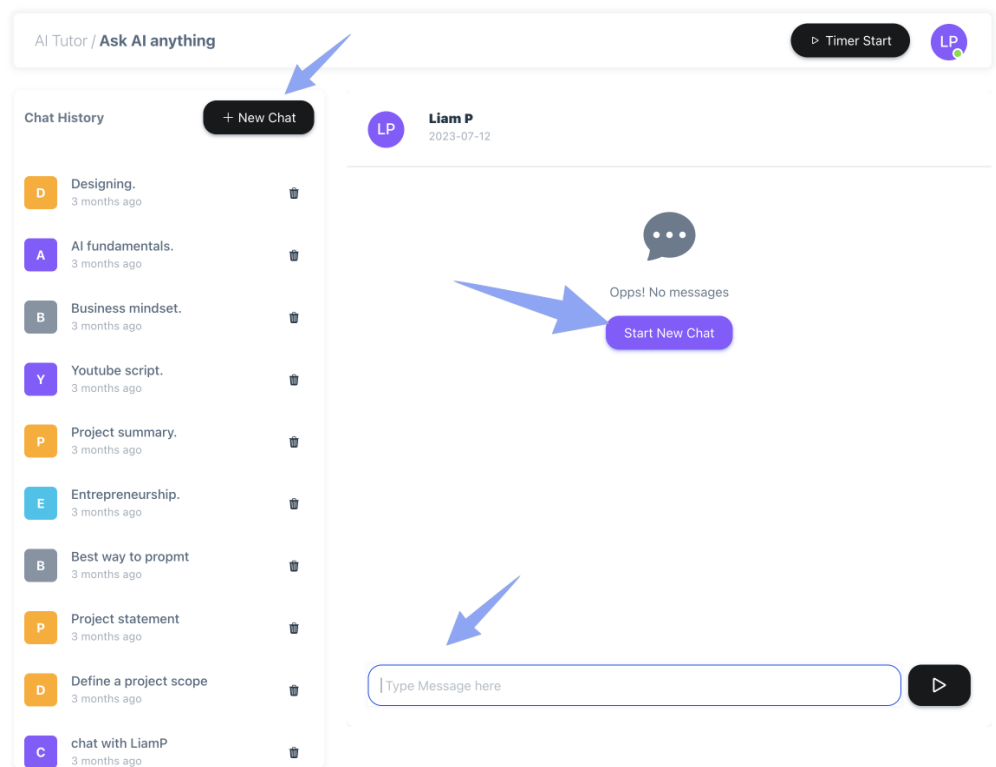

Deleting an Event

You can delete an event by simply clicking on the event. It will open up the modal window with the event's details and a "Delete" button. Click on this button to delete an event.

Ask AI Tutor

With StudyBuddy chat you can chat with AI like chatGPT. Ask AI anything and it will answer to your curious mind. This feature also keeps the history of previous chat where you can come back anytime to read old chats and you can also delete the chats if you want. Its an excellent tool to help you learn anything and become super productive.

Notes/AI note tool

The AI note-taking feature is a functionality or capability integrated into note-taking applications or platforms that leverages artificial intelligence (AI) technologies to enhance and automate the process of creating, organizing, and managing notes. This feature uses machine learning algorithms and natural language processing techniques to provide intelligent assistance and streamline the note-taking experience.

The screenshot displays the StudyBuddy application interface. On the left is a dark sidebar with a menu including Dashboard, To-dos, Study Goals, Assignments, Calendar, MY DESK, AI Tutor, Notes (highlighted), Flashcards, Sheets, Share, Resources, SETUP, and Settings. The main content area has a header with 'Documents / Manage your documents', a 'Timer Start' button, and a user profile 'LP'. Below the header is a 'Recent Notes' section with a 'New Note' button and a list of four notes: 'Getting Started', 'Creating and Sharing Documents', 'Address Book', and 'Quick Share'. Each note card shows a preview and a timestamp 'Opened: 2 minutes ago By: Liam P'. At the bottom is a 'Documents' table with columns for Title, Author, Last Update, and Manage. The table lists three documents: 'Address Book', 'Creating and Sharing Documents', and 'Editing an Image', all by 'Liam P' and updated '2 minutes ago'.

Creating a Note

Navigate to "Notes" and then click on "New Note." It will open a modal window and ask you to enter the document title. Then, it will create the document and redirect you to the document editor. The editor includes headings, tables, lists, and formatting options such as font size, color and style, paragraph spacing, alignment, and more.

Sharing a Note

To share, click on the "Share" button. It will generate the URL and appear on the modal box. Next, click on the copy to Clipboard to copy the URL to share.

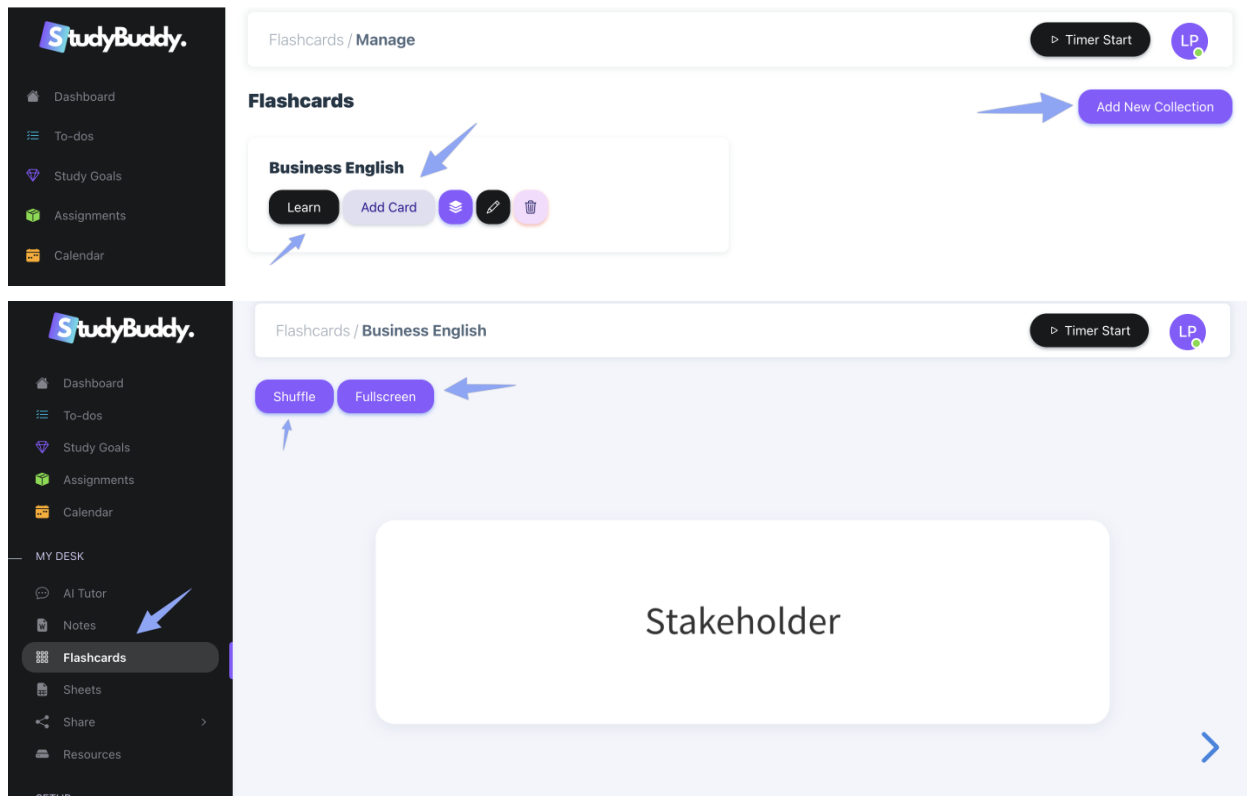

Flashcards

Flashcards are a proven tool to reinforce memory.

The Flash Cards feature in StudyBuddy is a versatile and interactive tool designed to assist in learning and information retention. It provides a digital, easy-to-use platform for creating and reviewing flashcards on a variety of subjects.

Create Flashcards

Users can create custom flashcards on any topic of their choice. Each flashcard consists of two sides. The front side generally contains a question, key term, or concept, while the back side houses the corresponding answer, explanation, or definition.

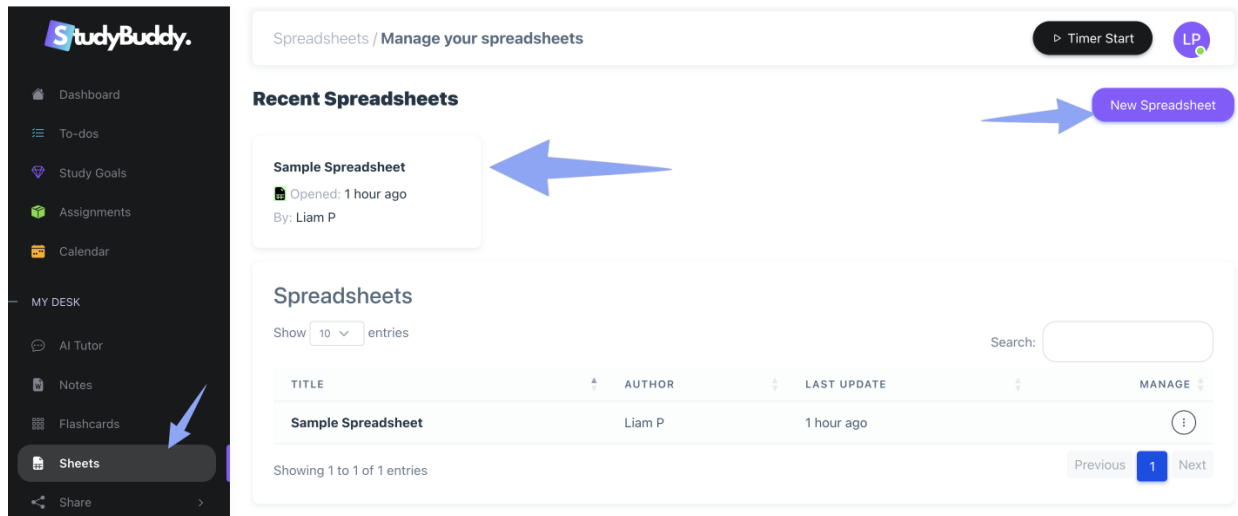

Sheets

StudyBuddy spreadsheet module is a cloud-based spreadsheet app that allows you to organize, analyze, and manipulate data in a tabular format. A spreadsheet contains a grid of cells arranged in rows and columns. Each cell can have a number, text, or formula. Formulas can perform calculations using the data in other cells, allowing users to create complex models and perform data analysis. You can use spreadsheets for a wide range of tasks, such as budgeting, financial forecasting, data analysis, and tracking of sales and expenses.

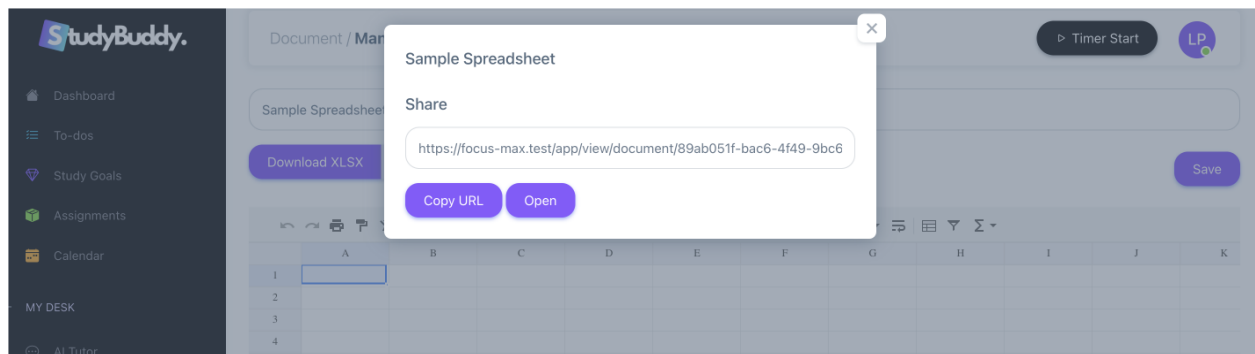

Creating a Spreadsheet

Navigate to "Spreadsheets" and then click on "New Spreadsheet." It will open a modal window and ask you to enter the spreadsheet title.

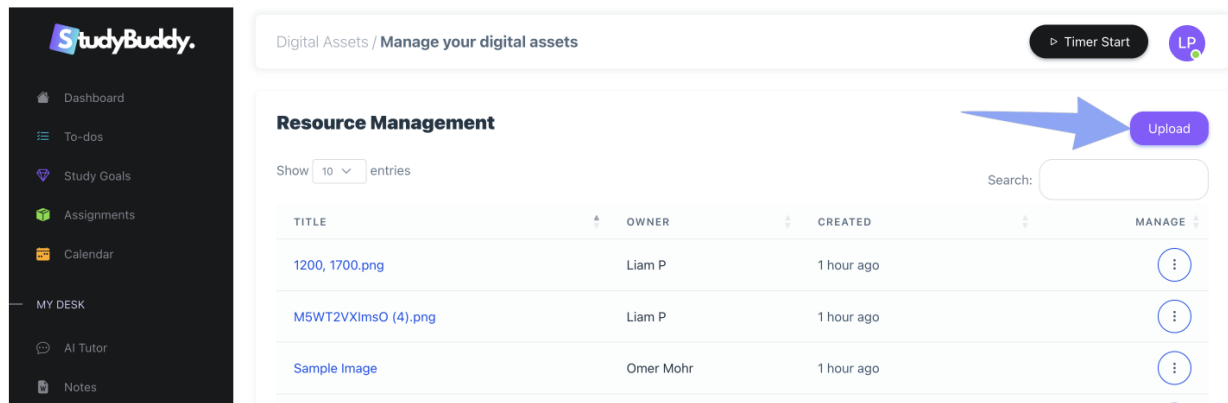

Sharing a Spreadsheet

You will share the spreadsheet the same way as documents. To share, click on the "Share" button. It will generate the URL and appear on the modal box. Next, click on the copy to Clipboard to copy the URL to share.

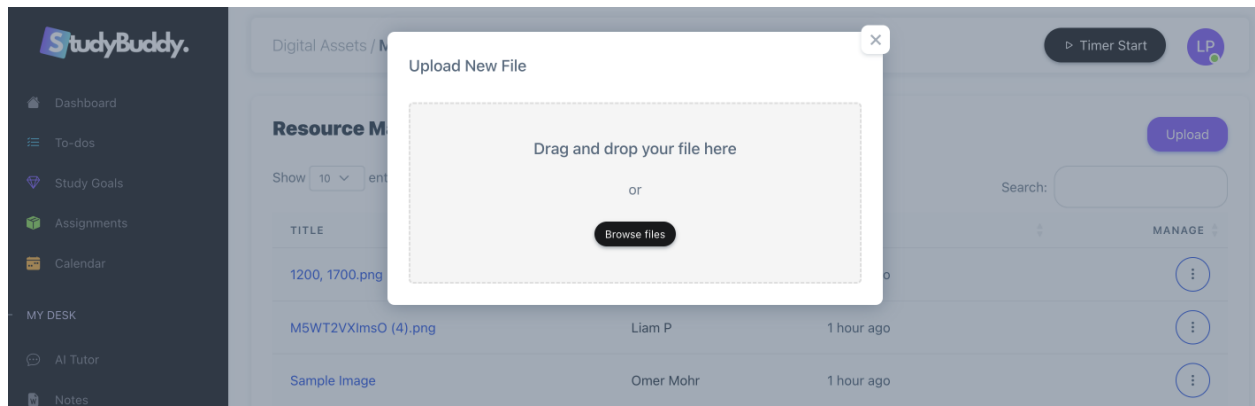

Resources

Files/ Digital asset management (DAM) is the process of organizing, storing, and retrieving digital assets such as images, videos, audio files, documents, and other types of digital content. StudyBuddy stores your digital assets as a centralized digital library, and you can access, share and reuse them with multiple users across your organization. StudyBuddy will help you to improve collaboration, streamline workflows, and increase productivity.

Uploading a File

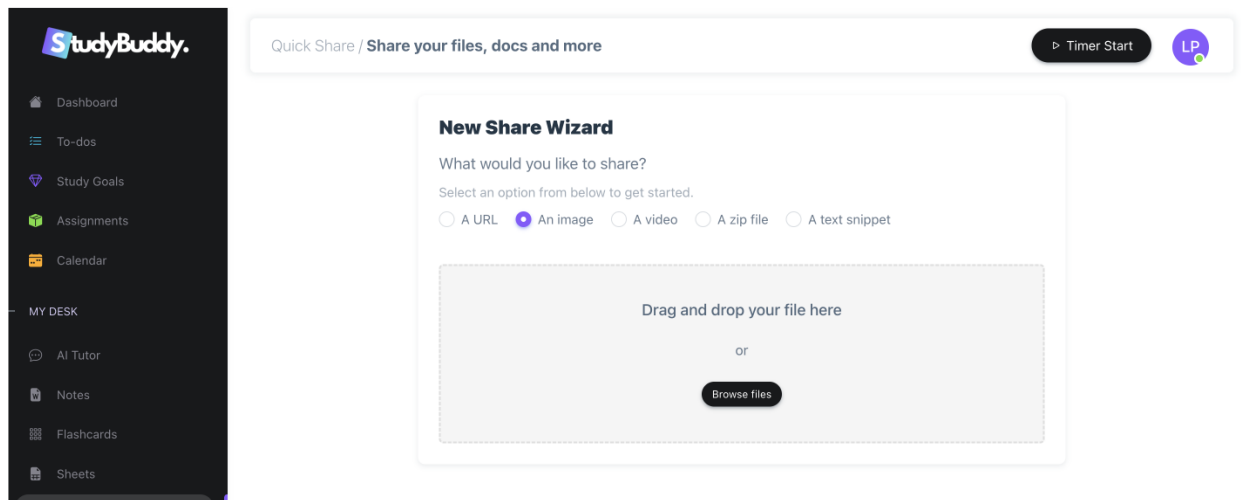

Go to Digital Assets and click on the "Upload" button in the top right corner.

Share

The Quick Share module helps you to share images, videos, zip files, and text snippets with the world. It generates a unique short URL to share. In addition, it includes an access log feature to

track your shares' opens.

Creating Share

To create a quick share, go to "New Share" under "Quick Share."

Then choose what you would like to share

Once you upload or fill up the form, it will generate a unique short URL, and every time anyone accesses the URL, the app will add it to the access log.

Settings

From Settings, you can configure the app name, replace the default logo, and manage users and API. In addition, you can check the application version.

General Settings

From the General Settings, you can change the workspace name and the logo. To access this, go to "General Settings" under Settings.

Managing Users

To manage your workspace users, go to "Users" under Settings. It will list all of the users on your workspace. You can add a new user by clicking "Add User."

The screenshot displays the StudyBuddy interface for managing users. The left sidebar contains a navigation menu with options like Dashboard, To-dos, Study Goals, Assignments, Calendar, MY DESK, AI Tutor, Notes, Flashcards, Sheets, Share, Resources, and SETUP. Under SETUP, 'Settings' is expanded, and 'Users' is selected. The main content area is titled 'Users' and includes a search bar and a table of users. The table has columns for NAME, EMAIL, PHONE, CREATED, and MANAGE. There are 10 users listed, and a pagination bar at the bottom indicates 'Showing 1 to 10 of 52 entries'.

Super Admin

A super admin can add and remove other admins and manage workspaces, subscribers, payment gateways, etc. If there are more than two super admins in the system, a super-admin can delete all but not himself.

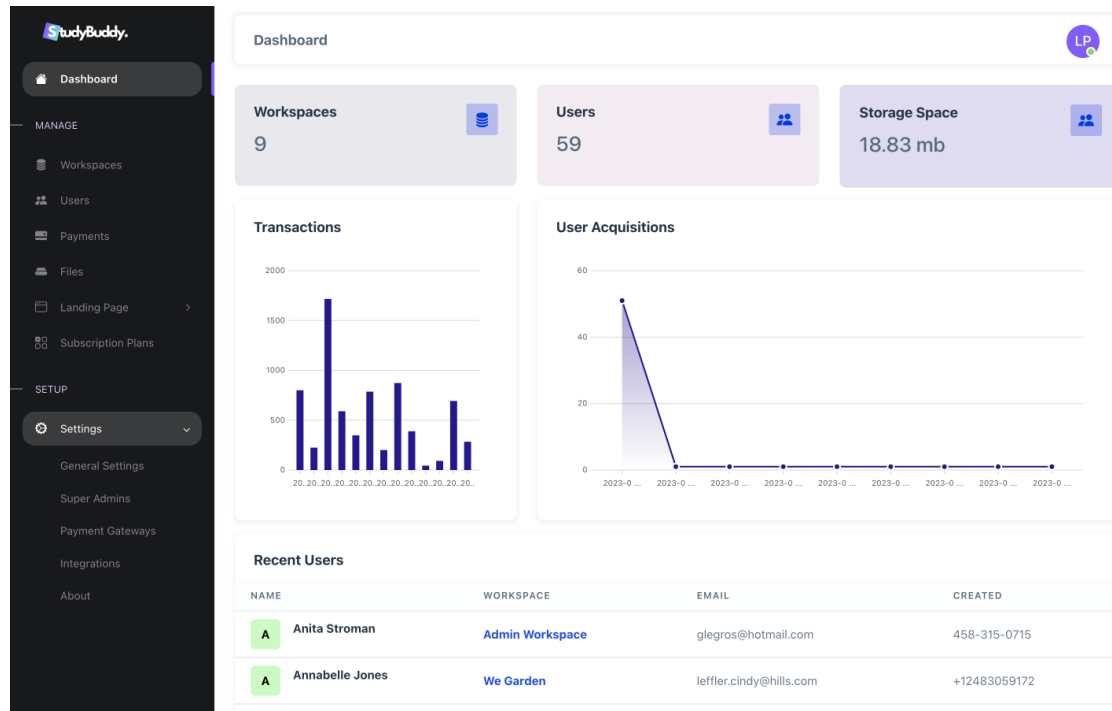

Accessing the Super Admin

Your super admin URL is your installation URL suffixed with "/super-admin."

You can also log in as a normal user, then you will see a button called "Switched to Super Admin" to access the super admin. This button will only show if you are a Super Admin.

Super Admin Dashboard

Your super admin dashboard provides at-a-glance views of key performance indicators (KPIs) relevant to your business. The metrics contain the number of users and workspaces.

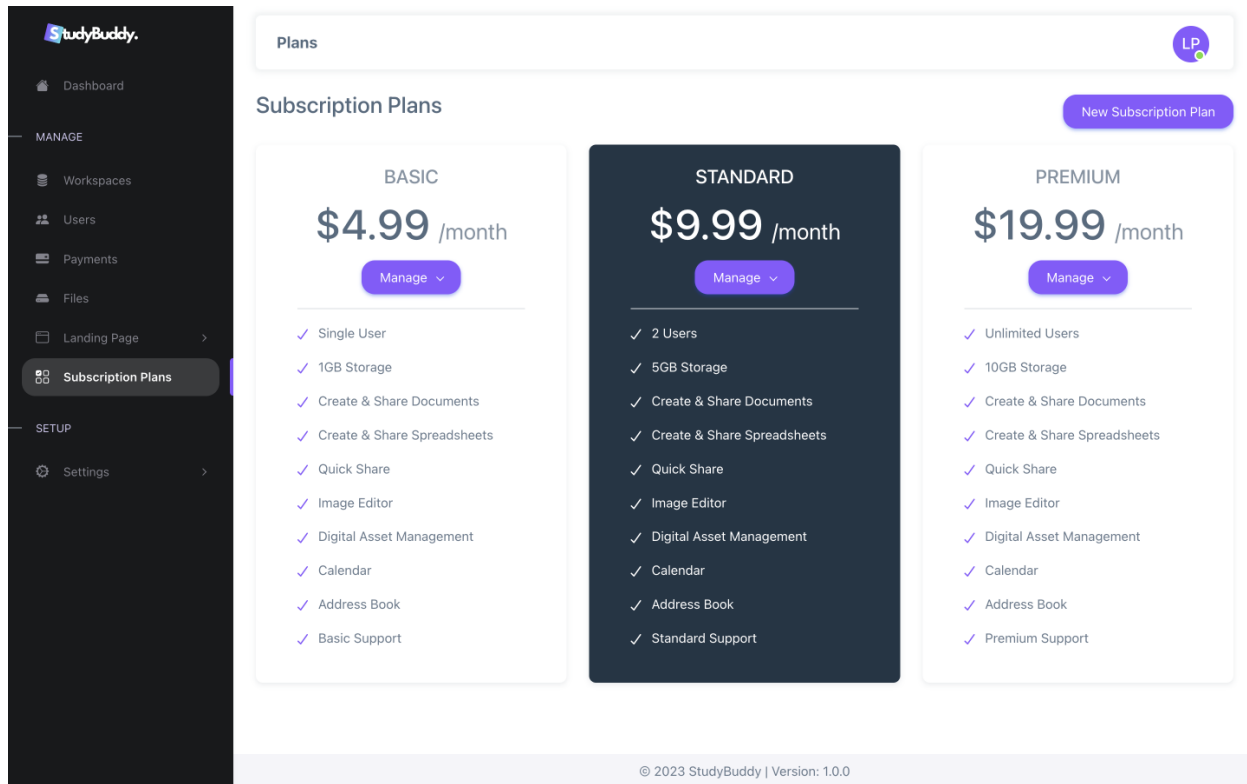

Subscription Plans

A **subscription plan** is an arrangement between your customer and you on how you will charge for your product.

Creating a Subscription Plan

In StudyBuddy, you can create as many subscription plans as you need. The system generates three subscription plans as a sample when you first install them. So, you can start modifying them or delete them if necessary.

And if you want to edit them, click on the "Manage" button and click "Edit."

To create a new plan, click on the "New Subscription Plan"

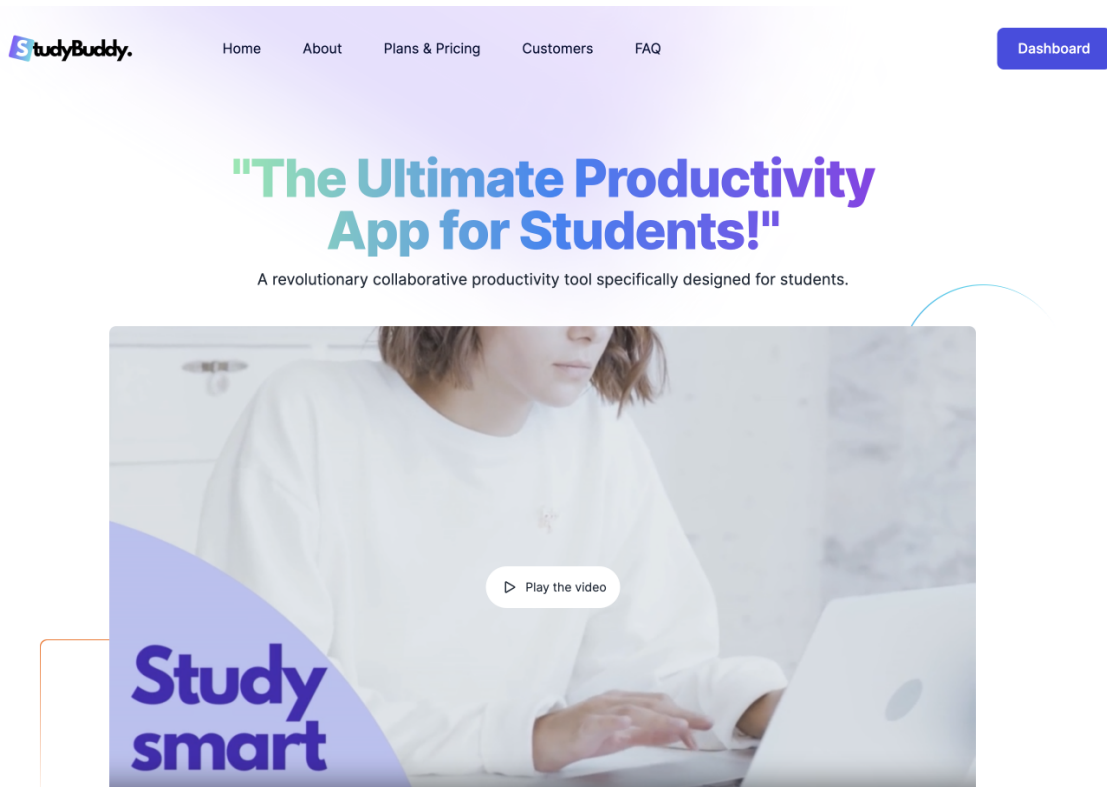

And fill out the form, here is an example below-

The screenshot shows the 'Plan' form in StudyBuddy. The form is titled 'Plan' and includes a 'LP' button in the top right. The form fields are as follows:

- NAME:
- Free?: ☐
- Featured?: ☐
- PRICE MONTHLY:
- PRICE YEARLY:
- File Space Limit (mb):
Leave empty for unlimited. 1000 for 1GB.
- Text Token Limit:
Leave empty for unlimited.
- Image Token Limit:
Leave empty for unlimited.
- Available Gateways:
 - PAYPAL PLAN ID MONTHLY:
 - PAYPAL PLAN ID YEARLY:
 - STRIPE PLAN ID MONTHLY:
 - STRIPE PLAN ID YEARLY:

Landing Page

The system comes with a default landing page to get started.

Editing the Landing Page

To Edit the Landing Page, go to "Manage Sections" under "Landing Page."

On the landing page, the pricing sections come dynamically from your subscription plans. To Edit them, edit your subscription plans from the "Super Admin."

PayPal

To use PayPal, you will need PayPal Client ID and PayPal Client Secret. Log in to your PayPal dashboard and retrieve them

1. Log in to your PayPal account developer portal at: <https://developer.paypal.com>
2. Once logged in, click on the "Dashboard."
3. Once to the Dashboard, click "My Account"
4. Then go to the "My Apps" link on the left.
5. Once on the "My Apps" page, click on the link to "Create App."
6. Give the name of the App, and save it. On the view app page, get the Client ID and the Secret.

Stripe

To find your Stripe API keys, log in to your Stripe account and navigate to the Developers section. Here, you'll see two sets of keys: your test and live keys. Use the live key in the production environment.
