

Inventory Management System

Multi Language Supported

Spider IT Limited

www.bdspiderit.com, md@bdspiderit.com.

WHAT IS INVENTORY SYSTEM?

Inventory Management Systems is a key instrument for businesses when tracking their inventory. Typically, Inventory Management Systems are used by firms that either sell a product or manufacture a product for purposes of accounting for all the tangible goods that allow for a sale of a finished product, or parts for making a product. The size and volume of a firm help dictate whether or not a firm is in need of such a system as they can be quite extensive and costly. Large firms that have thousands of components must have a system in place for the primary objective of tracking their assets.

THE KEY PARTS OF THIS MANUAL ARE GOING TO SHOW YOU HOW TO:

- INSTALLATION PROCESS
- NAVIGATIONS
- ADD NEW INFORMATION
- EDIT EXISTING INFORMATION
- LOG-IN TO YOUR WEBSITE

INSTALLATION PRECES:

1. Download .zip package
2. Upload it to your server
3. Extract the package (make sure all the folders have write permission)
4. Database Name : create a mysql database named **specome**
5. Edit .env file from **specome** /.env file
6. Database username : username of the Inventory database
7. Database password : password of the Inventory database
8. import database **specome.sql**
9. Run url via browser (<http://subdomain.yourdomain.com/admin>) and you will find this interface.
10. Login User Name: admin@gmail.com, Password: pass123
