

Part 2

themexpert.com/docs/wordpress-themes/edumodo/part2

Setting Up Megamenu

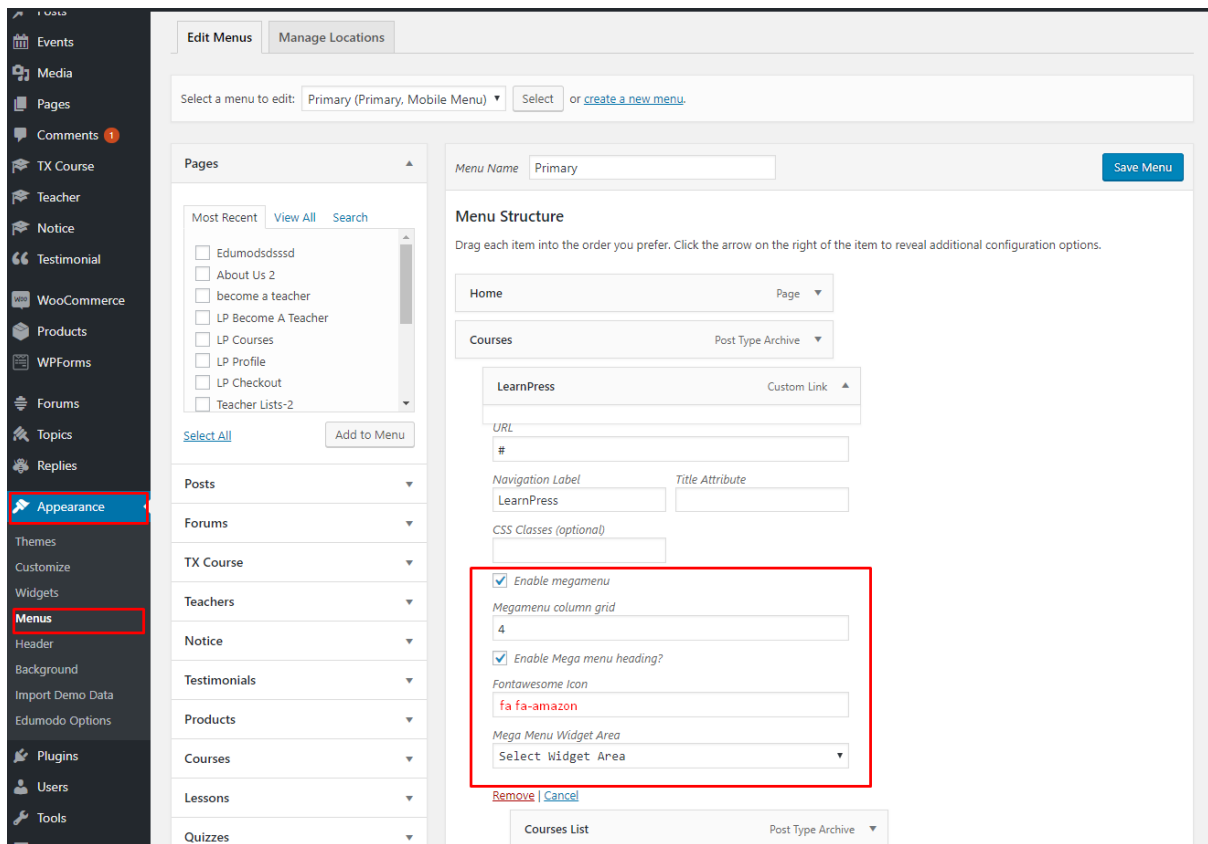

Megamenu comes built-in with Edumodo wordpress education theme. To use mega menu

- Go to Edumodo Options.
- Click on **Menu**.
- Now, enable mega menu and click on save changes. Mega menu is now activated.

Without Enabling the mega menu, you cannot use any functionality of it.

- Now go to **Appearance > Menus**
- Move the menu item right for which you want to enable megamenu.
- Tick on **Enable megamenu**

- Set the megamenu column grid size. (Grid size is a total of 12 columns, if you set column size to 4, there will be a total of 3 columns show in your megamenu.[size 4*3 columns = 12 grid])
- If you want to enable Mega menu heading, tick on **Enable Mega menu heading**
- If you want to show any fontawesome icon with your menu heading, just paste the fontawesome icon name at the field named **Fontawesome Icon**. You can copy the fontawesome icon code from this link. <https://fontawesome.com/v4.7.0/icons/>

(For example if you want to put icon named **facebook** in your megamenu heading, write **fa fa-facebook**[at here you must write **fa fa-** before any icone])

If you want to show any widgets in your megamenu, just select the widget area and that widgets will be visible on the mega menu.

Setting Up Multilingual site

To make your site multilingual, we prefer you use one of this plugins 1. WPML & 2. GTranslate. Just install and activate any of this plugins and make your site multilingual in general way.

Setting up RTL

Edumodo education WordPress theme comes with RTL support. Before you start developing rtl layout,

- Download and install WPML or GTranslate (you can use any multilingual plugin).

- Activate it and after activating the plugin generate a link for your rtl layouts site.
- Copy links and go to `Edumodo Optoins > General Setting > RTL

Edumodo 2.4.4

General Settings

RTL

Enable RTL **Enabled** Disabled

Language 1 English

URL 1

Language 2 Arabic

URL 2

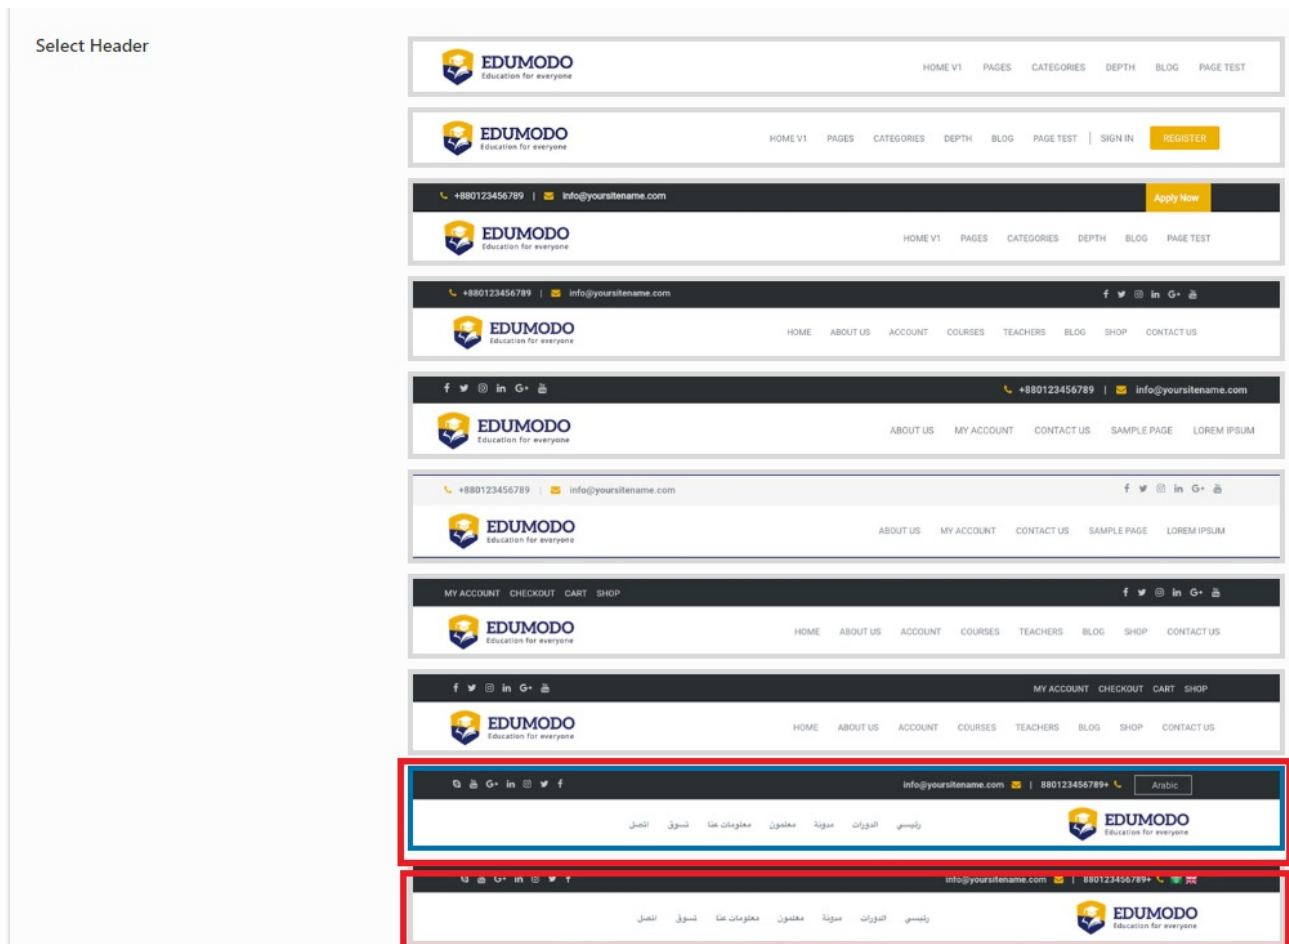

Default Language

☒ Language 1 ☐ Language 2

Save Changes Reset Section Reset All

- Enable RTL option.
- Paste the links to URL1 and URL2 and type the name of languages.
- Select your language that you want to show by default.
- Save Changes.

Now you can develop your rtl site with ease. In RTL you must use one of this headers below, or else your header will not work properly.

LMS: Learning Management System

Edumodo WordPress LMS theme comes with support for 3 most popular lms's. These lms are - learnpress, sensei, and learndash.

You can use this theme with or without LMS functionality, it's totally up to you. TX courses will allow you to enjoy the full functionality of an LMS.

LearnPress LMS

At here we are using plugin LearnPress for LMS functionalities. You can check the plugin tutorials and documentation from the official website of plugin.

- Plugin Link: <https://wordpress.org/plugins/learnpress/>
- Official LearnPress Documentation Link: <http://docs.thimpress.com/learnpress/>
- Recommended Plugins: <https://thimpress.com/product/learnpress-add-ons-bundle/>

Sensei LMS

At here we are using plugin Sensei for LMS functionalities. You can check the plugin tutorials and documentation from the official website of plugin.

- Plugin Link: <https://woocommerce.com/products/sensei/>
- You can also download sensei LMS from here : <https://github.com/Automattic/sensei>
- Official Sensei Documentation Link: <https://senseilms.com/documentation/>

LearnDash LMS

At here we are using plugin LearnDash for LMS functionalities. You can check the plugin tutorials and documentation from the official website of plugin.

- Plugin Link: <https://www.learndash.com/pricing-and-purchase/>
- Official LearnPress tutorials Link: <https://www.learndash.com/category/learndash-tips/>

How To's

Setup Homepage

- Go to **Settings > Reading**
- Select *A Static page on Front page displays* option.
- Choose your preferred home variation from the *Front-page* drop-down menu.
- Select **Blog** from the *Post page* drop-down menu.(optional)

Reading Settings

This theme recommends the following plugin: [Contact Form 7](#).

There is an update available for: [MailChimp](#).

Success Stories

Higher education institutions are improving student performance through partnerships that focus on digital and career readiness, critical and blended learning, STEM education, competency-based education, and data and analytics.

Read these stories about successful learners and institutions across the country. We have an actual partnership with Pearson in terms of making things better for students.

Our Course

Our courses offer a good compromise between the continuous assessment favoured by some universities and the emphasis placed on final exams by others.

What happens after my 30 day trial?

Your body is smart. Eventually, it will adapt to the stress of whatever training you are using and stop responding. Your 3 sets of 30 reps might work fine initially, but they won't work forever. Your training needs to be smarter than your body. Fly programs are designed to keep the body stressed and responding, so you will keep getting results.

What if I'm a complete beginner?

TX Courses

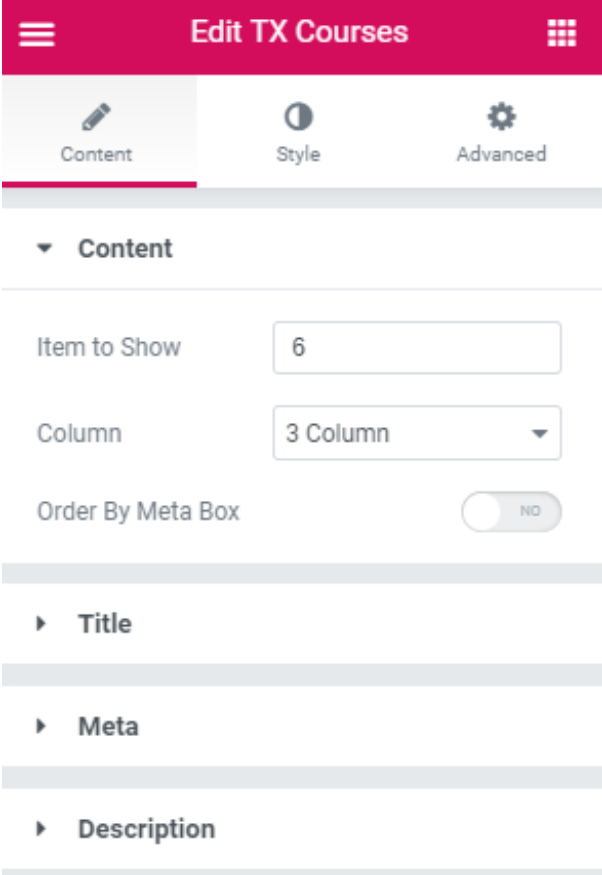

To add **TX Courses** element on a page, first-

- Go to **Pages**
- Click on **Edit With Elementor**
- Drag the **TX Courses** from the left **EDUMODO ELEMENTS** area and drop on your page.
- Customize the settings how you prefer and click on **Save** button to save the pages.

Content

Under content you have this options.

- **Item to show** : Define how many courses you want to show, at here.
- **Column** : At here, define how many columns you want.
- **Order By Meta Box** : If you want to order your courses with help of meta box turn on this option.
- **Order** : Define whether you want to order in ascending or descending order.
- **Order By** : Define what criteria you want to use for ordering.

The screenshot shows the 'Edit TX Courses' interface with a pink header. Below the header are three tabs: 'Content' (active), 'Style', and 'Advanced'. The 'Content' tab is expanded, showing settings for 'Item to Show' (6), 'Column' (3 Column), and 'Order By Meta Box' (toggle set to NO). Below this, there are expandable sections for 'Title', 'Meta', and 'Description'.

Under Title you have this options.

- **Excerpt Word** : Define the number of excerpt words.
- **Typography** : Create your own preferred typography for course title text by changing different options according to your wish.

Under Meta you have this options.

- **Show Category** : If you want to show category of courses than enable this option.
- **Show View Count** : If you want to show view count than enable this option.
- **Typography** : Create your own preferred typography for meta text by changing different options according to your wish.

Under Description you have this options.

- **Excerpt Word** : Define the number of excerpt words.
- **Typography** : Create your own preferred typography for description text by changing different options according to your wish.

- **Border Radius** : Maintain the border radius of course from here.
- **Box Shadow** : If you want to apply any box shadow than do it from here.
- **Box Shadow Hover** : If you want to apply any box shadow hover than do it from here.

Advanced

The screenshot shows the 'Edit TX Courses' interface. At the top is a pink header bar containing a hamburger menu icon on the left, the text 'Edit TX Courses' in the center, and a grid icon on the right. Below the header are three tabs: 'Content' with a pencil icon, 'Style' with an information icon (which is highlighted with a pink underline), and 'Advanced' with a gear icon. The 'Style' tab is expanded, revealing a 'Title' section with a 'Color' label and a black color selection box. Below the 'Title' section are three more sections: 'Meta', 'Description', and 'Border', each preceded by a right-pointing arrow.

- **Advanced** : Control margin, padding, z-index, entrance animation and add additional id or class to apply your custom design to an element.
- **Background** : Control element background color, hover style and more.
- **Border** : Apply your custom border style configuring different options from this tab.
- **Responsive** : Control making this element to appear on various devices.
- **Custom CSS** : If you want to add any custom code, you can add it from here.

The screenshot shows the 'Edit TX Courses' interface. At the top, there's a navigation bar with three tabs: 'Content', 'Style', and 'Advanced'. The 'Advanced' tab is selected. Below the tabs, there's a section titled 'Advanced' with a dropdown arrow. This section contains several settings:

- Margin**: A section with a speech bubble icon and a unit selector (PX, %, EM). It has four input fields for TOP, RIGHT, BOTTOM, and LEFT, and a link icon.
- Padding**: A section with a speech bubble icon and a unit selector (PX, EM, %). It has four input fields for TOP, RIGHT, BOTTOM, and LEFT, and a link icon.
- Z-Index**: A single input field.
- Entrance Animation**: A dropdown menu currently set to 'None'.
- CSS ID**: A single input field.
- CSS Classes**: A single input field.

Below the 'Advanced' section, there are four expandable sections, each with a right-pointing triangle icon:

- Background**
- Border**

Woo Latest Product

Publications

This book follows Tracey and her best friend – both aspiring dancers, but with very different ideas about what constitutes success. Their differences hold them close as children.

[VIEW ALL PUBLICATIONS](#)

To add **Woo Latest Product** element on a page, first-

- Go to **Pages**
- Click on **Edit With Elementor**
- Drag the **Woo Latest Product** from the left **EDUMODO ELEMENTS** area and drop on your page.
- Customize the settings how you prefer and click on **Save** button to save the pages.

Content

Under Content you have this options.

- **Shop Layout** : Choose layout that you want to use. There are currently two layouts available.
- **Column** : Choose the size of the column you want to use.
- **Item to Show** : Define how many items you want to show, at here.
- **Order by** : Define how you want to order products.
- **Image Height** : Adjust image height from here.
- **Border Radius** : Adjust border radius from here.
- **Box Shadow** : Customize box shadow from here.
- **Box Shadow Hover** : Customize box shadow hover from here.

Under Title you have this options.

- **Title Word** : Define the maximum number of word a title can contain.

Troubleshooting

Plugin Installation stucked or failed

When you are installing required plugins, it might happen that plugin installation is taking too much time or stucked on a plugin. If this situation occurs, just reload your page and try to install plugins again. If you see any note with message “Failed or try again later”, try to install this plugins again at a later time.

Demo content import failed

If you cannot import your demo, there can be some possibilities like.

- Required plugins are not installed.
- Required plugins are not activated.
- There is more than one LMS is activated.

And last of all you might be

Facing a hosting issue. Edumodo works on most of the hostings. But some hostings may block certain permissions. To solve this problem, you can contact your hosting provider or ask for our support and we will help you to solve this problem.

404 Error in all pages

If you face any 404 face issues, please update your permalink. To update permalink go to Settings -> Permalink and then flash permalink.

Page broken on course page or Style not loaded correctly

If you ever see your course pages are broken, check if you have 2 LMS's installed. Deactivate and uninstall the unnecessary one.
